

COVID-19 UPDATE

While everyone is navigating through these unprecedented times, we wanted to reach out to our Manufacturers Representatives and Distributors to ensure you that at NSK America, the health and safety of our team is our top priority.

With that said we have implemented multiple contingency plans at our office to ensure the continuity of our business. Our technical support and customer service team are working remotely until April 8th, but are available to support you, so that sales and service will be provided. Orders and shipping will not be affected with our contingency plan. We are open and plan to stay open throughout this crisis to support in any way we can help.

Local support may be requested, but due to the circumstances, please understand that we may not be able to accommodate. However, we can work to support in other ways such as phone calls and video conferences.

Our NSK factory in Japan is working at full capacity and has had no interruptions of business as all our components are either made in our factory or sourced locally in Japan. We are very fortunate to have the support of NSK Japan as we navigate these unique uncertain times.

We Are Here for You to support you and help in any way we can, and we mean it. Please feel free to reach out to me directly with any questions or concerns any day or time at 847-894-8812.

Mike Gabris
